

Disappearing Blinds from SHY

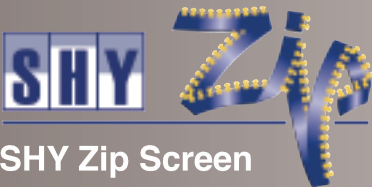

Images by Ace Contracts (London) Ltd

It is often said "The last thing you think about is the blinds". This was not the case when Ace Contracts were asked to provide roof blinds for a bespoke conservatory in Loughton and turned to SHY.

Boxes to conceal the roller are built into the design. So when you add in the SHY Zip System operation with slimline guides to support the cloth as it travels, integrated motorisation with no visible wires or cables and complete colour coordination of boxes and Zip side channels, once the blinds are retracted the disappearing act is complete.

When in use the technically excellent light and heat control from the Screen 2 fabric with 3% openness is equally unobtrusive.

SHY Zip System – hidden excellence.
