

SHY – for when it ‘simply’ has to be perfect

SHY (UK) is well known for its ability to tackle the most technically difficult roller blind installations. Yet there are times when we are called on to do a simply straight forward blind, just perfectly.

Such a recent ‘calling’ was at the Kempston Methodist Church. The main hall was completely refurbished where nine, historic stained glass windows had to be covered, providing subtle shading for the congregation whilst not hiding the view of the beautiful glass.

SHY used its Obscura perfectly engineered rollers, quite and efficient, together with white open weave screening fabric.

The result – simply stunning.
