

# Good News from SHY

## The Twins are Getting Bigger

SHY UK announces its new arrivals. Even larger twin rollers – and what a strapping pair they are. Like their siblings they offer two blinds from the same headbox – a shade and a blackout. The new pair however fit into SHY's new 200mm square headbox and provide a twin system up to 4400mm wide and a drop of 3800mm.

Naturally as a chip off the old SHY block they can be incorporated with the SHY Zip System. This ensures the perfect seal and produces rooflight and sloping window blinds without the need for guide wires.

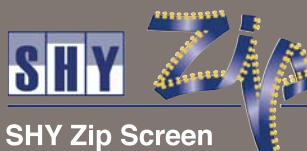

SHY UK – where exceptional roller blinds run in the family.
